EXPERIENCE

Logichainge
Front-end Developer
Feb 2025 – Jul 2025

• Graduation project where I implemented an Address Validation system by improving user pain points and removing unnecessary workflows.
• Integrated automatic address validation with duplicate detection in Manual and Bulk address entries to replace users' current worfklow.
• Ensure system behaviour as expected through UX/UI iterations and testing sessions with users.
• Designed in Figma, implementation in Vue 3.

Innerbuddies
Front-end Developer
Feb 2023 – Jul 2025

• Built an AI generated automatic dashboard result with food recommendations & overview of bacteria(good & bad) inside your gut.
• Redesigned the Food diary for the 3-day food intake that user fill in after purchasing the test kit.
• Working with the back-end developer, created an API endpoint, providing the personal bacteria list & levels of the user.
• Designed in Figma, implementation in Angular 16 and Python (Jupyter Notebook)

Maina Town
Web Developer Freelance
Jan 2024 – Current

• Built the Maina Town Weekend page, in which the event is showcased with all the details of the programme and shuttle service.
• Redesigned key parts of website and created new content for the website, which invigorated the brand.
• Designed in Figma, implementation in Wordpress using Elementor.

Telus International
Teleagent
Jan 2020 – Jul 2021

• Servicing UK Car Rental calls, expanding knowledge of English and greatly improving problem solving skills & team collaboration.
